

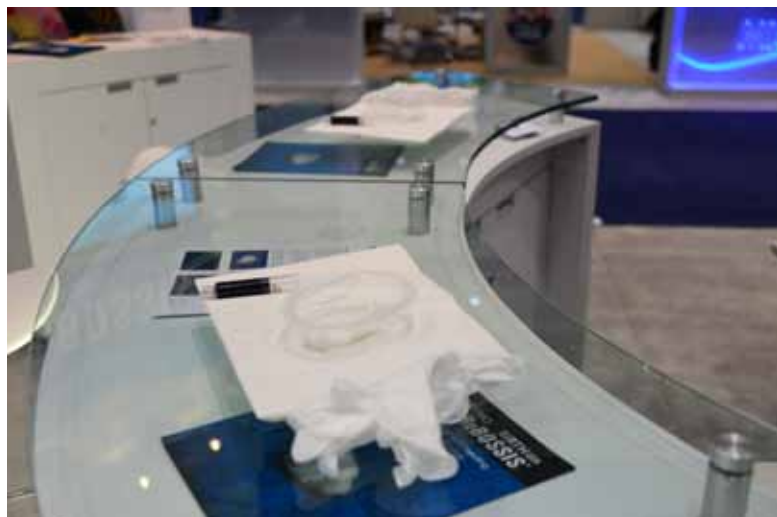

Exhibition at the 31st NASS's Annual Meeting organized at Boston Convention and Exhibition Center in Boston, Massachusetts.

Just as in the previous exhibitions, lots of medical doctors gathered at our Booth, showing how busy our booth was. The popularity toward ReBOSSIS remained as high at that time as before.

Our Booth was featured with our ReBOSSIS demonstration: Visitors can feel and touch a real ReBOSSIS, and also can check how well ReBOSSIS is mixed with artificial blood.

Dr. Stewart (center) has successfully made lots of ReBOSSIS-using operations so far. Clinical Trials are increasing in number.

ORTHOREBIRTH has a contracted business tie-up with KiSCO in terms of domestic applications. Mr. Shoji, President of KiSCO International, the European Foothold of this company, visited our booth.

NASS2016 was the first important event for ORTHOREBIRTH USA, which is the 100% owned subsidiary of ORTHOREBIRTH. The third person from the right is Ms. Doris Blake, COO.
