

Introduced Our Business Operation in Okinawa

Back on July 13, We, ORTHOREBIRTH joined a special lecture and seminar, organized by Industrial – Academic – Government Cooperation Society, at Collabo-Sangakukan Plaza in Edogawa, Tokyo. The theme of the lecture was “Financing System Designed for Local Business Growth and How to Organize Industrial – Academic – Government Collaboration Aiming for Revitalizing Local Communities and Economy.” Mr. Akihiro Yamada, Vice-Director of our Production Technology Department worked as a panelist at the panel discussion. Mr. Yamada explained why we advanced into Okinawa Pref., what we’ve been doing and what good influence we’ve given to Okinawa local economy so far, and what kinds of R&D we are planning to do from now on in Okinawa. Thus, we were able to advertise ORTHOREBIRTH as a good example of enterprise which has been performing and promoting its business in a good collaboration with the local economy in Okinawa.
